## **DROPBOX** - Senior Software Engineer | August 2021 - Present

- Currently working on [Dropbox Replay](#), a web-based video review tool
- Experienced working with outside stakeholders to launch features that improve workflows for users within Replay in Typescript, React, Jotai, and Python
- Experienced on working on rich, delightful features such as file uploading, first-time onboarding flows, and reliable video playback
- Completed a new hub for Dropbox Sign signatures to help complete migration away from Hellosign Dashboard into Dropbox home as part of the October 2023 product launch showcase
- Experienced with leading new products (0-1) from MVP phase implementation to alpha release cohorts
- Have worked with multiple stakeholders for project planning and completion of features within large company-wide releases or working towards specific ARR goals

## Senior Software Engineer | August 2021 - Present

- Worked on [Dropbox Transfer](#), a file-sharing feature within Dropbox with 30k WAU
- As part of Transfer, used Typescript, React, Python for web, desktop, and mobile
- Acted as engineering lead that launched Dropbox's first non-storage based SKU (Dropbox Transfer Plan) in October 2020. This project generated \$5 million in ARR in its first year
- Integrated logging and user survey instrumentation features with 3rd party services such as Amplitude and Sprig
- Worked with Desktop team counterparts to revamp the Dropbox Transfer endpoint within the Mac Dropbox desktop app in accordance to [Apple File Provider](#) changes introduced in Mac OSX Catalina
- Worked on the Dropbox Previews surface on new PDF/image editing features such as file watermarking and markup within web previews

## **iHeartRadio** - Software Engineer | February 2018 - September 2019

- Worked on the [iHeartRadio web](#) experience, player, and widget
- Managed and deployed new releases of the application, and daily bug fixes
- Shipped new features, such as the new homepage (Q3 2018), Your Library (Q2 2018), Podcast page redesign (Q2 2018) in accordance to Stuff Media acquisition, and refreshed widget player (Q1 2018)
- Worked in Typescript, React, Redux, Cypress, and GraphQL

## **Clarifai** - Frontend Engineer | October 2017 - February 2018

- Added organization and structure to the existing project codebases, including organizing and refactoring Javascript and LESS files to unify codebases
- Created a reusable component library for a new custom content management system for the marketing website for the company

## **Social Tables** - Software Engineer | January 2015 - September 2017

- Led and delivered the visual product refresh of Diagram, the flagship diagramming product
- Worked on a new 0-1 product called Destination, an event space marketplace product
- Utilized technology such as NodeJS, React, Javascript (Babel/ES6), Three.js, CSS (LESS), AWS

## **Education** - Fall 2011 - Spring 2015

University of Maryland - College Park

College of Behavioral and Social Sciences

B.A. Economics, Minor: Business Analytics
